

We are delighted to welcome a distinguished scientist from the **University of Cologne** – a rare opportunity not to be missed!

PD Dr. Christian U Hübbers

Group leader in Molecular Head and Neck Oncology at University of Cologne
Germany

Metabolic reprogramming in oropharyngeal cancer: From viruses to vulnerabilities

This lecture will focus on metabolic reprogramming in oropharyngeal cancer. I will discuss how viral factors influence oxidative stress and metabolic pathways, contributing to treatment resistance in HPV-positive and a subset of HPV-negative tumors, and how these insights may help identify new therapeutic opportunities.

DATE

Tuesday,
June 30, 2026

TIME

13:00
(1:00 PM)

VENUE

Seminar Room COR1
U Nemocnice 5,
Prague
Institute of Biochemistry
and Experimental Oncology

ALL ARE WELCOME!

This lecture is suitable for students, scientists, academics, and anyone interested in science, especially in the field of cancer biology, virology, metabolism, and treatment resistance.

DON'T MISS THIS OPPORTUNITY!

Join us for an inspiring lecture and discussion with one of the leading researchers in the field.
